MEDIA KIT 2024

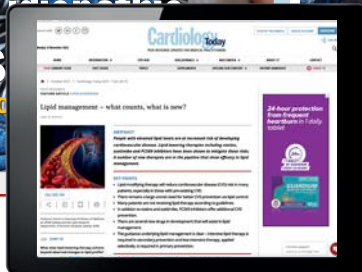

A range of clinical journals dedicated to different specialties for GPs and other specialists

Cardiology Today

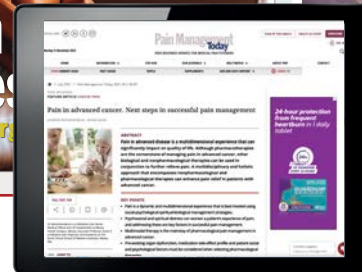

Now a dedicated section in **Medicine Today**

Pain Management Today

Now a dedicated section in **Medicine Today**

MedicineToday Journals

Endocrinology Today • Respiratory Medicine Today • Dermatology Collection • Focus on cardiometabolic matters • Cardiology Today • Pain Management Today

Backed by more than 66 years of editorial excellence ...

Medicine Today (formerly *Modern Medicine*) has been continuously published in Australia since 1957. Its publishers launched a range of '*Medicine Today* journals' to provide topic-specific, focused publications for general practitioners and selected specialists. The journals provide a dedicated environment to showcase products directly to a targeted audience.

Written and peer reviewed by multidisciplinary and other specialists, the editorial content provides authoritative, practical clinical information and is commissioned following discussions with the Editorial Advisory Board and other senior consultants. All invited authors hold senior roles in their respective fields of medicine.

Medicine Today journals bring the most important clinical information to the forefront of doctors' minds in peer reviewed publications devoted to Endocrinology, Respiratory medicine, Cardiology, Pain management and Dermatology.

Editorial Content

What makes up an issue?

Features – Peer reviewed, commissioned, in-depth reviews of practical clinical information

Perspectives – Shorter, pithy articles on specific issues

Case studies – Discussions of the management of cases typically presenting in general practice

Investigations – A question and answer approach to the selection of appropriate tests and interpretation of results

Acute presentations in general practice – Case-based articles on the acute presentations of disorders encountered in general practice

NEJM Journal Watch summaries – Selected physician-authored summaries and commentary on the most important medical research provided by the NEJM Group

What our peer review process means to you

Providing accuracy, credibility and independence, the peer review process is an indispensable part of *Medicine Today's* editorial process. Borrowing from this proven method, every article published has been rigorously peer reviewed by a minimum of two expert consultants and by one general practitioner.

The reviewers provide instructive comments, suggestions and recommendations on the suitability for publication for each article. Authors receive detailed reports requesting revisions and responses to the comments before articles are accepted for publication.

The result is a consensus on each topic – meaning you can be sure your product message is delivered in the most credible, authoritative environment available to reach your target audience.

Every article is a basis for action, providing doctors with the most relevant, insightful and accurate consensus information achievable.

Editorial Advisory Board: behind the scenes

Having major input into the peer review process, commissioning program and author suggestions, the Editorial Advisory Board have a vital role in maintaining the journal's high editorial standards.

Each Board comprises different subspecialties and general practitioners.

MedicineToday Journals

Endocrinology Today • Respiratory Medicine Today • Dermatology Collection • Focus on cardiometabolic matters • Cardiology Today • Pain Management Today

Article Reprint Options: available as printed copies and licensed PDFs for electronic distribution

Single Article Reprints

At *Medicine Today*, we know that doctors trust information from authoritative, credible and independent sources and that this influences their opinions and prescribing habits.

Single article reprints are available from all *Medicine Today* titles, including *Endocrinology Today*, *Respiratory Medicine Today*, *Cardiology Today* and *Pain Management Today*.

Licensed PDFs

License agreements are available for electronic distribution of article reprints in PDF format.

Distribution: printed copies

Delivery takes 5 to 10 working days from final approval. Reprints are delivered in bulk to clients for their own distribution.

Advertising

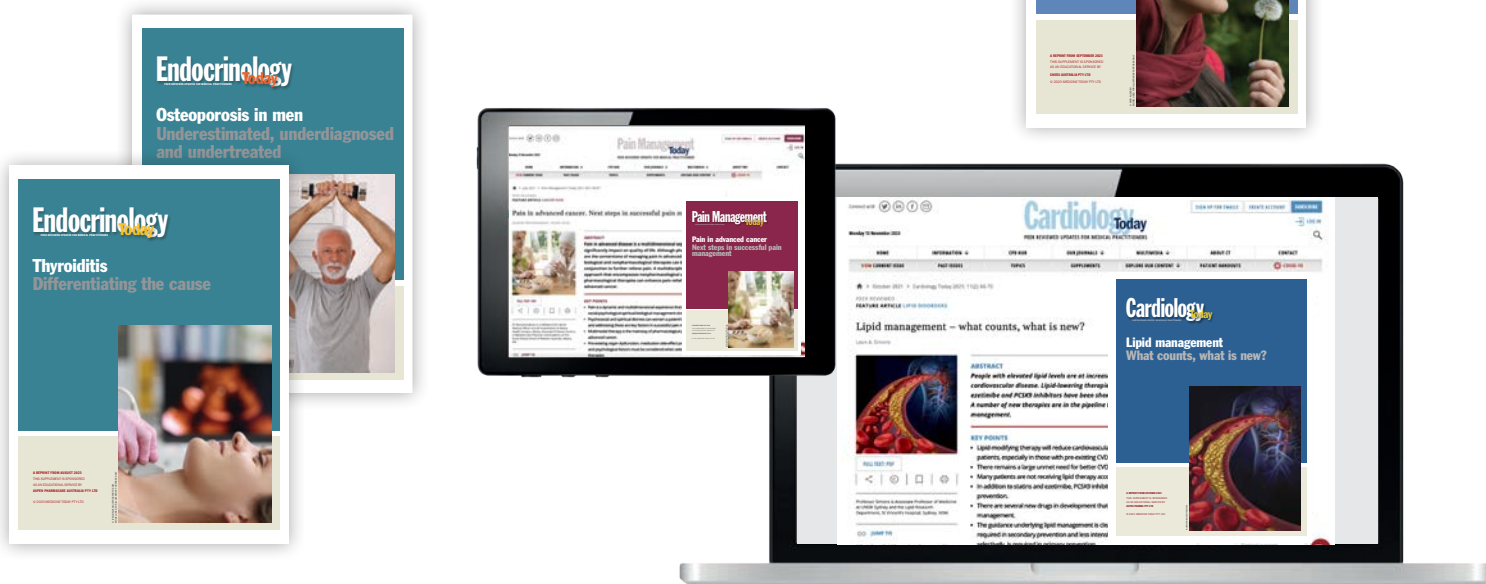

FP advertising is allowed where space is available. The size of the reprint can increase to include ads. Sponsor acknowledgement is on the front cover, in addition to the standard disclaimer at the end.

Pricing: printed copies

Size	1000 copies	2000 copies	5000 copies	10,000 copies
4 Pages	\$7645	\$7910	\$9392	\$11,390
8 Pages	\$8441	\$9126	\$12,075	\$16,854

16 Pages	\$13,906	\$14,772	\$20,334	\$26,861

All prices exclude GST and are not media commissionable. Larger quantities can be quoted on request.

Ask our team for pricing of PDF licences for electronic distribution.

Endocrinology Today

From the Editor-in-Chief ...

What is *Endocrinology Today* about and why does it matter to both GPs and endocrinologists?

There are a wide variety of endocrine disorders that are common in clinical practice. These range from chronic metabolic conditions, such as type 2 diabetes and obesity, to osteoporosis and other conditions that have become more frequent in the ageing population. The consideration of up-to-date, clinically important information concerning these conditions and other endocrine disorders, including thyroid, adrenal and pituitary disease as well as mens' and womens' health, is important.

Endocrinology Today provides clinicians with a valuable resource written by specialists in the endocrine field. The range of articles includes feature articles, perspectives and case studies, and continues to upskill clinicians, including primary healthcare professionals, in the broad and fascinating range of endocrine disorders. All submissions are peer reviewed and reader-friendly to ensure that each article is relevant to everyday clinical practice.

Professor Roger Chen MB BS(Hons), PhD, FRACP

Senior Staff Specialist at St Vincent's Hospital, Sydney;
Conjoint Professor, UNSW Sydney and Clinical Professor,
The University of Sydney, Sydney, NSW

Editor-in-Chief and Chair of the Editorial Advisory Board,
Endocrinology Today

Respiratory Medicine Today

From the Editor-in-Chief ...

What is *Respiratory Medicine Today* about and why does it matter to GPs?

Respiratory conditions are the most commonly managed problems in general practice and, based on Australian Bureau of Statistics 2015 data, around seven million Australians have a chronic respiratory condition.¹

We are excited to have an enthusiastic and energetic Advisory Board of respiratory physicians and general practitioners who will ensure you continue to be provided with a wide range of easy-to-access and up-to-date clinically relevant articles from specialists in the respiratory field. We have lofty ambitions to cover the whole respiratory spectrum, rather than just concentrating on the most common diseases.

Dermatology Collection

From the Editor-in-Chief ...

What is the *Dermatology Collection* and why does it matter to both GPs and dermatologists?

Dermatological disorders are estimated to represent 20% of conditions seen in general practice. Atopic dermatitis affects about 20% of children and psoriasis about 2% of the whole population. The Australian population is highly affected by skin cancer and conditions related to sun damage. Additionally, the issue of cosmetic dermatology is becoming a real issue with the ageing population. It is an exciting time in dermatological therapeutics, with new biological agents to treat the more severe inflammatory skin diseases and laser therapy for a range of cosmetic conditions. The GP plays a key role in the diagnosis of dermatological conditions and provides shared care with the specialist. The *Dermatology Collection* helps the Australian GP to readily access and consider up-to-date clinically relevant information from specialists in the dermatology field. Reader-friendly feature articles are used to support and upskill primary care health professionals in modern dermatology practice.

Associate Professor Gayle Fischer OAM MB BS, MD,

Focus on cardiometabolic matters

From the previous supplement editors ...

What is *Focus on cardiometabolic matters* about and why does it matter to GPs, endocrinologists and cardiologists and renal physicians?

Cardiometabolic disease describes a spectrum of common but often preventable conditions that pose a significant health and economic burden. Advances in screening and investigation to identify predisposing and contributing risk factors pave the way for preventive management in patients. Furthermore, the emergence of new therapies and approaches in diabetes, hypertension, hypercholesterolaemia and kidney disease will result in an enhanced toolkit in our fight against cardiometabolic disease.

The aim of this supplement is to provide GPs and other healthcare professionals with clinically relevant updated information on this rapidly evolving field to enhance the cardiometabolic health of their patients.

Professor Louise Burrell MBChB, MRCP, MD, FRACP

Professor of Medicine and Head of the Cardiovascular Research Group at the University of Melbourne; and Head of Medical Unit 4 and Director of Research in General Medicine at the Austin Hospital in Melbourne Vic; and a Board Member of the Institute of Breathing and Sleep.

MedicineToday Journals

Endocrinology Today • Respiratory Medicine Today • Dermatology Collection • Focus on cardiometabolic matters • Cardiology Today • Pain Management Today

Mechanical Specifications

Material Delivery

- Via email (up to 15 MB only) to:
prueanderson@medicinetoday.com.au
mariamarmora@medicinetoday.com.au
- Over 15 MB – please use a file transfer link of your choosing e.g. wetransfer

Material Instructions

- Publication name
- Issue date
- Key number
- Ad size
- Special instruction/positioning

Electronic File Requirements (High-resolution Acrobat PDF only)

High-resolution PDFs must be supplied with a minimum of **3 mm bleed** and **visible crop marks**. Colour bars, crop marks and registration marks must be at least 5 mm away from trim.

CHECK LIST

Screen

- Four colour – 133 lines per inch

Colour

- Hi-res Pdfs must be supplied in **CMYK**
- RGB, PMS and Spot colours must be converted to process colour
- Total ink weight should not exceed 310% with a 90% black maximum

Images

- **CMYK**
- **JPG** or **TIFF** format
- Hi-resolution required, minimum of 300 dpi at 100% scaling
- Black and white line art, minimum 1200 dpi at 100% scaling
- All transparencies must be flattened

Type

- Postscript fonts or outline fonts should be used – do not use TrueType fonts
- All fonts should be embedded
- All live copy must be kept 10 mm from all edges
- Any type less than 10 pt bold is not suitable for reverse printing
- Body copy text that is black should be set to 100% black, not a 4 colour makeup of black
- Solid black background areas should have an additional 30% of cyan tint to provide additional density

Proofs

- Supply a 3DAP digital colour proof of the artwork at 100%.

Note. Medicine Today cannot be held responsible for colour discrepancies in print if there are inaccuracies in electronic files supplied to us or if an industry standard proof is not provided.

If further technical information is required, visit: www.3dap.com.au

Although the internal production process may verify that material is within specification, the onus is placed firmly on the tradehouse/sender to supply material to specification. It is also a requirement that advertising material is delivered on time so quality control measures can take place. Late material may miss these checking procedures that could pick up possible problems/errors.

Important Notes for Designers of Double Page Spreads (DPS) – Saddle Stitched

- DPS must be supplied as two single pages, left and right
- Include 3 mm bleed on all edges
- Avoid running type across the gutter on a DPS
- Spacing of letters in headings or large text should clear the gutter
- All live copy must be kept at least 10 mm from outer edges
